THE BENEFITS OF CBD

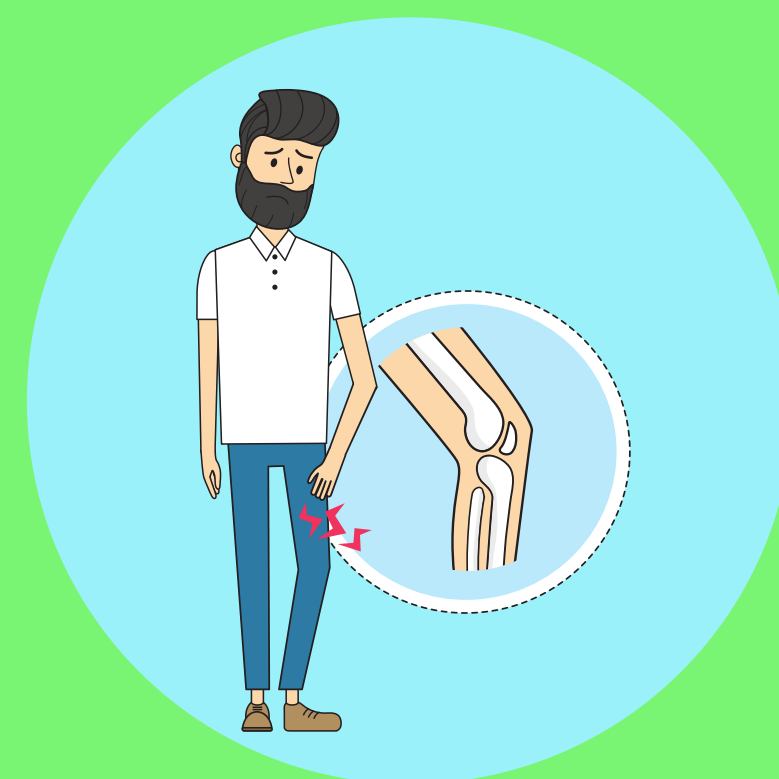

SEIZURES

To date, the most significant research supports the use of CBD oil for those who experience seizures

EPILEPSY

In 2018, the FDA approved a CBD oral solution to treat people with one or two rare forms of epilepsy

OSTEOARTHRITIS

Research shows that dogs using CBD oil for osteoarthritis were more active and had less pain.

ANXIETY

Preclinical evidence strongly supports CBD treatment for generalized anxiety disorder.

PTSD

CBD can both facilitate the extinction of aversive memories and block their reconsolidation, possibly through potentialization of the eCB system.
